## APPLIED AI & DATA ANALYST | AI PRODUCT, AGENTIC WORKFLOWS, SQL & PYTHON

Open to Remote & Relocation | devashish1000@gmail.com | +1 531-721-9423 | linkedin.com/in/devashishn | github.com/devashish1000

### PROFESSIONAL SUMMARY

Applied AI and analytics professional with **7+ years** translating business needs into **AI-enabled workflows**, data products, and measurable operational improvements. Shipped **5+ AI-enabled applications** and automated end-to-end, multi-step workflows across analytics, document processing, and operations. Experienced in intelligent document processing, LLM-assisted automation, REST/JSON integrations, AI output evaluation, human-review controls, UAT, and executive reporting. Combines Python, SQL, and BI expertise with product thinking and cross-functional delivery.

### SELECTED IMPACT

Shipped **5+ AI-enabled applications** | Automated **15+ end-to-end, multi-step workflows** | Eliminated **30+ manual handoffs** | Delivered **1,200+ hours in annual productivity savings** | Co-founded Headwell iOS app

### CORE CAPABILITIES

**Applied AI & GenAI:** LLM workflows | AI agents | Prompt design | Structured outputs | Human-in-the-loop | AI evaluations | Output quality assurance | IDP/OCR | Confidence-based exception handling

**AI Product & Delivery:** AI use-case discovery | Requirements | Epics and user stories | Acceptance criteria | Evaluation rubrics | Edge-case testing | UAT | Defect triage | Adoption and ROI metrics

**Data & Automation:** Python | SQL | REST APIs | JSON | ETL | Data-quality controls | Workflow automation | Tableau | Power BI | Forecasting | KPI governance | Executive storytelling

### PROFESSIONAL EXPERIENCE

#### Product Business Analyst

Jul 2026-Present

Bellevue University

Omaha, NE

- Translate ambiguous stakeholder needs into analytical and product requirements, process flows, source-to-target mappings, user stories, acceptance criteria, and decision-ready outputs; partner with Product, Engineering, QA, and SMEs to prioritize dependencies and support releases.
- Investigate application, data, and REST/JSON integration issues; define business rules, expected payload behavior, edge cases, and test criteria; verify remediation through functional, regression, and UAT testing.
- Designed and evaluated an AI-enabled intelligent document processing workflow across 5 document classes and 250 records, achieving **96% classification accuracy**, 94% field-extraction accuracy, and 72% straight-through processing through schema validation, confidence thresholds, exception routing, and human review.

#### Senior Business Performance Analyst - Corporate Analytics

Apr 2023-Jul 2024

Southwest Airlines

Dallas, TX

- Owned source-to-report analytics across 15+ KPIs and 100+ cost-center leaders, transforming operational and financial data into dashboards, performance narratives, variance explanations, and recommendations for senior stakeholders.
- Automated ETL, validation, reconciliation, and reporting controls, **reducing manual work 75%**, saving 35 hours monthly, and cutting cycle time 60%.
- Improved forecast accuracy to 96% by standardizing metric definitions, applying record-level quality checks and variance thresholds, and reconciling analytical outputs to source systems.

#### Senior Business Planning & Optimization Analyst

Nov 2020-Mar 2023

LinkedIn

Omaha, NE

- Built and validated SQL/Python forecasts across 120+ planning streams at 94% accuracy, identifying capacity constraints eight weeks early and improving delivery timeliness 28%.
- Automated capacity, SLA, quality, and KPI reporting for 300+ analysts across 5 sites, **saving 100+ hours monthly** while meeting targets for 8+ quarters.
- Partnered with Product Managers, SMEs, QA, and Operations to translate requirements, resolve data discrepancies, pressure-test scenarios, and communicate trade-offs.

#### Business Analyst

Jan 2020-Nov 2020

Shearman & Sterling LLP

New York, NY

- Standardized utilization, cost, and profitability analytics across 16+ practice areas supporting 2,000+ attorneys, improving reporting efficiency 55% through reconciled KPI definitions and executive reporting.
- Identified **\$15M in opportunities** and evaluated a \$30M technology investment using ROI, total cost, implementation risk, feasibility, and strategic-fit analysis.

#### Analyst - Finance & Budget

Aug 2019-Dec 2019

NYC Department of Education

New York, NY

- Built a prioritization framework for \$1B+ in capital proposals across 220+ sites, informing more than **\$250M in executive investment decisions**.
- Defined data-validation controls and business rules across 220+ site migrations, improving reporting accuracy and operational efficiency 40% while supporting integrity, security, compliance, and continuity requirements.

### EDUCATION & CREDENTIALS

#### MBA, Supply Chain & Logistics

Dec 2025

University of Nebraska Omaha

Omaha, NE

Highest Distinction | GPA 3.77/4.0

#### B.S., Management Information Systems

2019

University of Nebraska Omaha

Omaha, NE

Highest Distinction | GPA 4.0/4.0

Selected study: Business Analytics | Statistics for Data Science and Business Analysis | Agile Scrum | Product Strategy | AI/LLM Workflow Automation

### TECHNICAL TOOLKIT

Generative AI | LLM workflows | AI agents | Prompt design | AI evaluations | Human-in-the-loop | AI application deployment | Vercel | Multi-step workflow automation | IDP/OCR | REST APIs | JSON | Python | SQL | Tableau | Power BI | ETL | Data validation | Requirements | UAT
